Subject: Comments for the committee meeting last night...

I'd like to thank the committee for getting this information out so early in the process. The plans we were shown tonight will be a huge step forward in making our downtown much more "user friendly". The walking path that will connect the north-south segments already in place will make the Village a more "walkable" community, which will enhance safety and draw people to the downtown businesses.

I'm impressed that the Village has found grant funding for much of this project. This will only enhance our property values, as a more safe, walkable community will draw younger families to the area.
