Subject: Downtown Master Plan

Trustees Cornell

I was have a idea for the future of our downtown master plan.
Kansas City use smart technology for it downtown area.
The city also has installed smart kiosks which gives real time information in the event of an emergency , tourism information maps of the area for business, etc.

I feel as community if we look at options like this today and the Future we continue to make Elm Grove a special place to live today and beyond for all it residents and business.

Thank you for my consideration as an idea with the downtown master plan.

Sincerely,
Joseph J Coffey
