Hi,

..... other suggestion I forgot to mentioned in list sent earlier and one mentioned a long time ago when park was being overhauled, is to have a separate off-street path paralleling Juneau Blvd that goes across the south side of village hall/park property to link the west path with the east path so people are not walking on the shoulder; at least most of it except when they get to the bridge and may cross bridge using shoulder. This situation occurred with the Village of Hartland in coordination with Waukesha County along Lisbon Rd. crossing Bark River.

I have a hunch such path is delayed until the small bridge get on Juneau Blvd. is rebuilt?

Have a safe and Happy Holidays!

Rick
