**Subject:** SSND Area Development

Dear Zoning and Planning,

As a resident of Elm Grove I am against the current proposed development of SSND by the Mandel Group, especially their request for rezoning the property!

This planned development topic seems to be somewhat hidden from EG residents and not being communicated openly to residents.

Residents like me are just now becoming aware of this proposed zoning change, the Mandel high density development plan and I've yet to hear one resident who supports this! It does seem strange that communications from City Hall seem to be much less for this highly important proposal compared to other less important topics like proposing new sidewalks!

Can you please provide immediate notice to all residents on this proposal that clearly communicates how people can provide their opinions to our elected officials?

I believe the extreme majority of EG residents will be opposed to this development and zoning change unless a clear explanation of how EG residents will truly benefit is provided by either City Hall or The Mandel Group. Otherwise this rezoning proposal should automatically NOT be approved!

Sincerely,

Tom Castile
